Marketing Operations & Automation

I build and retrofit the systems marketing and revenue teams run on, making them easier to operate while they generate more. Agency work put me inside 30+ businesses, working in whatever platform each one ran. I've spent the last four years applying that at scale in SaaS, most of it in Marketo, where I'm a Certified Expert.

Technical Proficiencies

Platforms & Tools	Marketo, Salesforce, HubSpot, SFMC, Pardot, SharpSpring, Klaviyo, Intercom, ON24, Zoom Webinar, Outreach, SendGrid, ZoomInfo, Clay, ChurnZero, ZenDesk, Monday.com
Lead Management & Data	Lead scoring, routing, lifecycle architecture, database segmentation, SQL, Excel, CRM sync, list hygiene, deduplication
Development & Automation	HTML/CSS, Velocity, Liquid, JavaScript, Python, REST APIs, Webhooks, OAuth, n8n, Zapier, Claude API, Claude Code, custom MCP servers
Analytics & Deliverability	GA4, Google Tag Manager, Looker Studio, Heap, Pendo, PostHog, SPF/DKIM/DMARC

Professional Experience

Senior Email Marketing Manager

I

ActivTrak

Remote • 07/2024 – 08/2026

Promoted to own email and automation systems. Rebuilt infrastructure and developed new programs to fit evolving business needs and new ICP demographics.

Marketo instance owner: Velocity scripting, dynamic content architecture, template development, segmentation, lifecycle routing, and ON24/Salesforce integrations. Owned in-app messaging and targeting in Intercom.

- **Drove \$2.83M in attributed opportunity revenue** across 583 opportunities and 1,022 SQLs (Jan 2025 to Aug 2026, fractional attribution).
- **Led the ON24 platform evaluation and migration** and rebuilt the webinar ops workflow, from intake through post-event automation. Program drove **6,393 registrations and \$3.05M in influenced ARR** across 20 webinars in 2025, including **\$850K in new pipeline** (highest on record). thisistimsresume.com/projects/webinar-migration
- Designed and implemented the lifecycle intake system, replacing a single-board setup I'd run for three years that had outgrown the volume and breadth of requests. Form submissions route to work-type boards in Monday across email, nurtures, in-product, and webinars.
- Owned QA and build execution from brief through deployment, including a Claude-based check comparing built emails against source content docs.
- Built account-level personalization in Velocity, parsing raw strings at send time and resolving five usage metrics against benchmarks into **3,125 possible email variants**, with fallback handling for malformed data. thisistimsresume.com/projects/velocity-email
- Managed a database that **grew from 195K to roughly 399K** records across Salesforce, ZoomInfo, and operational sources, running hygiene and suppression programs in Marketo to keep the marketable base clean.

Took over and rebuilt a Marketo instance with outdated segmentation and templates that couldn't support dynamic content.

Scope: template architecture, segmentation, dynamic content, Velocity scripting, Salesforce sync, and smart list architecture.

- Redesigned the database segmentation taxonomy, **65 segments across 12+ dimensions**, and restructured the email template system for implementing dynamic content. Replaced per-segment builds across 12 to 16 sends monthly, saving **4 to 6 hours on the most complex sends**. [thisistimsresume.com/projects/audience-segmentation](#)
- **Built Velocity scripting tokens** for webinar email personalization, automating content variation based on poll responses and saving the lifecycle team 2 to 3 hours per email across 2 to 3 webinars monthly.
- **Reduced unsubscribe rate from 0.2% to 0.05%** against a 0.19% SaaS benchmark through template and segmentation work.

Grew the agency's marketing automation practice from 1 to 10 clients. Platform-agnostic technical and strategic lead, implementing in client-preferred systems.

Scope: built and owned client automation systems, including **HubSpot, SharpSpring, SFMC, and Pardot**. Lead routing workflows, CRM automation, and email programs.

- **Generated \$150K in new client revenue** within 3 years, plus expansion revenue across the existing book. Owned client relationships, system builds, and cross-functional project teams.
- Built multi-criteria lead routing and behavioral scoring across client accounts, assigning by territory, company size, and industry, with sales tasks triggered at score thresholds. **Migrated 30K contacts** off Microsoft Dynamics. [thisistimsresume.com/projects/siftex-crm](#)
- Designed and implemented a dual-series nurture with weighted engagement scoring that advanced leads into a conversion track at a set interaction threshold, taking a gym management SaaS client from a **0.33% click rate to 15.93%** against a 2.45% benchmark.

Additional Experience

Interactive Designer GO	Hartford, CT • 01/2018 – 07/2019
Owner & Creative Director Loxley + Leaf	Cromwell, CT • 03/2016 – 01/2020
Web & Graphic Designer Dornenburg Kallenbach Advertising	Bloomfield, CT • 05/2015 – 01/2018
